- Contributing maximally to the health and well being of our people and sustainable development through tier 1 input

## OUR VISION

To make Environmental Services Pakistan the first choice in environmental monitoring, analysis and consultancy services in Pakistan and its global locations.

## INTRODUCTION

*Caring for our environment, our resources and our people!*

Environmental Services Pakistan - **ESPAK** was established in 2016 with the aim to meet an identified need in the marketplace for the specialist environmental firm to provide 'fit for purpose' environmental solutions to the targeted industries with exceptionally high quality and at reasonable cost. Through certification, calibration, testing & advisory services ESPAK fully understands the importance of delivering results that improves customer's products and processes. Our team comprises of highly experienced and resourceful professionals with a goal to facilitate our clients as per requirements of their projects.

ESPAK provides a comprehensive range of Environmental Consultancy, Monitoring, Testing & Assessments as well as workplace Health, Safety & Environment (HSE) related Services in various industries such as Production, Energy, Textile, Agriculture, Chemical, Food & Beverages, Healthcare, Telecommunication and Construction. We at ESPAK ensure sustainable development by incorporating personnel safety & social welfare as an integral part of its work philosophy.

The development of ESPAK laboratories in Lahore has given rise to a dedicated center of excellence that offer benefits to our clients by using state-of-the-art equipment and providing the highest level of technical expertise over a broad spectrum of materials and methods. After the success of ESPAK at Lahore, the company started another venture from Islamabad Office with the endorsement from PAK EPA Islamabad. ESPAK in light of its vision has now gone global with setting up an advanced office in Sultanate of Oman in Middle East as "POINT B SET". Point B Services, Engineering and Technology (SET) plans to be distinguished as market leader with an excellent reputation in the Middle East by delivering valuable services to customers worldwide.

## WHY ESPAK

ESPAK as a reliable Environmental Services Company, providing customized solutions to client needs. No matter what your needs are, we provide fit to purpose solution with exceptional service attitude. We comply various National and International Standards including ISO QMS 9001, ISO EMS 14001, OHSAS 18001 and ISO 17025, to name a select few. ESPAK also holds accreditation from Environment Protection Department Punjab & Federal Environmental Protection Agency Islamabad. Choosing ESPAK ensures the acceptability of our produced results and compliance with legal requirements resulting in the peace of mind and satisfaction of our clients as well as discharge of ethical and moral responsibilities. Moreover, our provided solutions are best in class which enhance the productivity and cost-effectiveness of processes.

## QUALITY POLICY

Our Quality Policy describes the principles that everyone in ESPAK follows to ensure that we are recognized and trusted for our integrity, quality of work we perform and standards we set.

In order to achieve this, we are committed to:

- Sustain high level of quality in all level of processes by meeting the agreed specifications, relevant standards and legal requirements.
- Produce results that exhibits high levels of quality and reliability.
- Enhance employee's competency by promoting quality awareness through timely trainings.
- Continually improve our systems and processes to keep a track of our professional excellence.
- Ensure Client's satisfaction by providing services that are customized in close collaboration with client.

## Quality Assurance & Quality Control Policy

Our technical procedures are sourced from United States Environmental Protection Agency (USEPA), American Public Health Association (APHA), American Society of Testing and Materials (ASTM), International Organization for Standardization (ISO) as well as other official and scholarly bodies in the field of application. To maximize the quality and usefulness of data, we go hand in hand with our clients with full coordination in the planning, quality aspects, actual procedures and data analysis and interpretation steps. Transparency of our work and client awareness are our hallmark and distinguishing features.

Our Quality Assurance Practices aim to control the aspects of calibration and standardization, preventive and remedial maintenance, proper instrument selection and use, quality consumables, clean environment, replication and verification, suitable field and in-house facilities, ensuring authenticity and traceability of data collection, recording and maintenance of Quality Control (QC) database.

QA/QC data is provided to the clients upon request.

## Health Safety & Environment Policy

Dedicated to excellence in performance; ESPAK is committed to achieve and continually improve the high standards of environmental protection, operational safety and community goodwill not only for its employees but also for its stakeholders and communities by undertaking the following:

- Protect and improve health, safety and security services of our people at all times.
- Eliminating non-conformances to achieve zero accident vision by providing safe systems of work.
- Controlling pollution by adopting green practices to improve environmental performance.
- Ensuring reduction of natural resource consumption and emission as well as the reduction of waste.
- Provision of complete personal protective clothing and equipment to employees and ensuring its use.
- Ensuring compliance with all applicable legal requirements, client's safety protocols and company's Standard Operating Procedures (SOPs).
- Identifying, estimating, avoiding and eliminating (where possible) all the operational significant Environmental impacts, Hazards and Risks by adopting effective and appropriate control plans to provide a healthy, safe & environment-friendly workplace.
